PAGE 5

## System Connections

1. Insert both satellite speaker cables into their respective output sockets located at the rear of the sub-woofer. (FL : Front Left Speaker, FR : Front Right Speaker)
2. For dimensional sound, insert audio cable into respective AUX socket and connect to laptop, game console or mobile device.
3. Once you've connected the system in your preferred method, insert the power plug into ~120V wall outlet and switch power to ON.

Note: Please avoid leaving magnetic objects near the system

PAGE 6

## Positioning the Speakers

\***Sub-woofer** can go anywhere on the floor of the room (there is no directional requirement for bass effect)

\***FL and FR** speakers should be in front of the listener facing inward toward the center

## FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### \*RF warning for Mobile device:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
